Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1-29 rejected under 35 U.S.C. 103(a) as being unpatentable over Oakley et al '474.

The cited prior art is of record in the previous communication, and its disclosures are as detailed therein. Applicant takes the position that although the cited prior art discloses polymeric articles including surgical gloves which are cut resistant, the cited prior art does not disclose cut resistant and puncture resistant articles as claimed.

It is the Examiner's position that Applicant's arguments are not convincing and do not distinguish over the cited prior art for the following reasons. As noted by the Applicant, patentees disclose the same type (alumina) of particles in the same type polymeric composition. The filler material is disclosed as being "round". Clearly, this disclosure would make patentees particles "substantially spherical" as claimed and therefore, the feature of "puncture resistance" as claimed would be an inherent feature of the prior art article, even though patentees do not specifically mention said feature. Applicant's argument about "macrospheres" and "microspheres" do not distinguish over the prior art because these would also be inherent features of the "round particles" bound by the polymeric coatings.
